

Marie Skłodowska-Curie Actions Postdoctoral Fellowships

Are you a researcher in possession of a doctoral degree and with no more than eight years of full-time equivalent research experience? Discover the opportunities of Marie Skłodowska-Curie Actions Postdoctoral Fellowships for researchers at the International Institute for Applied Systems Analysis.

Our institute invites Expressions of Interest proposals to participate in the Marie Curie Individual Fellowships scheme with IIASA as host institution.

The call is now open and will close on 9 September, 17:00 CEST. Eligible candidates are invited to approach us anytime before 31 May 2026.

Under the framework of Horizon Europe - Marie Sklodowska-Curie Actions (MSCA), IIASA intends to support experienced researchers to develop research proposals with reference to the 2026 call for MSCA-European Postdoctoral Fellowships.

Career development: If you are awarded an MSCA fellowship you will also become part of the vibrant IIASA community of early to mid-career researchers. We offer immersion in world class research, development of core research skills, and also skills related specifically to systems thinking and systems analysis, as well as exposure to international processes, organizations and networks. IIASA also maintains an extensive network of alumni/ae that can offer broader perspectives on career paths.

Financial support: the European financial contribution for a Marie Skłodowska-Curie Fellowship is a flat-rate for the entire period of the project. The stipend is generous and while working at IIASA this is exempt from income tax.

Application information

A good application for an MSCA fellowship takes time.

To find the program suitable for your research please view our research page. Once you have formulated a proposal we encourage you to contact the relevant program representatives.

Eligible candidates are invited to approach us anytime before **31 May 2026** by applying through the link below with a:

1) A detailed curriculum vitae, with the list of publications;

and 2) A one-page document with the abstract of the MSCA research proposal.

The candidates IIASA supports will be selected by mid June 2026 and the MSCA-PF proposal must be submitted to the European Commission by the call deadline on 9 September.

! Important Information !

Please note that your application cannot be saved and must be completed and submitted in a single session!
